PROFESSIONAL SUMMARY

Results-driven Python Developer with expertise in Artificial Intelligence, Generative AI, and banking workflow automation, complemented by front-end UI/UX design and open-source development experience. Completed a Python with Generative AI course (2025-2026) and a one-year internship with the VGLUG Foundation, working on real-time open-source projects including a Tamil spell-checker. Leverages hands-on experience from a Co-operative Bank internship and specialized training in cargo booking operations to deliver innovative fintech solutions, while also building e-commerce websites and contributing to the open-source community. Proven ability to streamline operational processes, enhance data preprocessing, and develop scalable AI-driven applications.

CORE COMPETENCIES

Technical: Python, SQL, NLP, Generative AI, LLM Fundamentals

Design: Front-End UI/UX Design, E-commerce Website Development

Banking/Finance: Banking Operations, Workflow Automation, Cargo Booking, Process Optimization, Data Processing

Tools & Frameworks: Data Preprocessing, Text Tokenization, Model Training, Automation Logic

Open Source: FOSS Advocacy, Open-Source Contribution (Tamil Spell-Checker Project)

Soft Skills: Problem Solving, Fast Learning Capability, Cross-functional Collaboration, Idea Generation & Innovation

PROFESSIONAL EXPERIENCE

Open Source Intern - VGLUG Foundation | *One-Year Internship*

- Contributed to multiple real-time open-source projects over the course of a one-year internship
- Worked on front-end UI/UX design for an open-source Tamil spell-checker project
- Collaborated with the open-source community to build and refine practical technology solutions
- Gained hands-on experience applying open-source tools to real-world development challenges

Banking Operations Intern - Co-operative Bank

- Analyzed and documented banking workflows including deposit processing, customer onboarding, and fund transfer mechanisms
- Identified 5+ opportunities for manual process automation, documenting recommendations for implementation
- Studied organizational systems and hierarchical structures relevant to operational efficiency
- Gained practical exposure to banking compliance, internal controls, and operational best practices
- Collaborated with cross-functional teams to understand end-to-end customer transaction flows

TECHNICAL PROJECTS & INITIATIVES

Tamil NLP Model Development

- Developed and trained a Natural Language Processing model for Tamil language text analysis
- Implemented a data preprocessing pipeline including text cleaning, tokenization, and feature extraction
- Achieved improved model accuracy through iterative training and parameter optimization
- Demonstrated practical application in regional language AI solutions

Tamil Spell-Checker (Open Source)

- Designed the front-end UI/UX for an open-source Tamil spell-checker application
- Focused on usability and accessibility for native Tamil-language users

AI-Based Workflow Automation System

- Designed a Python-based system to automate repetitive banking and operational processes
- Reduced manual operational effort by 40%+ through intelligent process logic automation

- Implemented efficiency optimization algorithms focusing on time and resource utilization
- Created a modular, scalable architecture suitable for enterprise financial applications

E-Commerce Website Development

- Developed e-commerce websites with a strong focus on front-end UI/UX design
- Applied user-centered design principles to improve site usability and conversion

Open Source Contribution & Technology Advocacy

- Actively promoted Free and Open Source Software (FOSS) adoption within professional network
- Contributed to community awareness initiatives around open-source tools and technologies
- Demonstrated commitment to collaborative development practices

CERTIFICATIONS & PROFESSIONAL ACHIEVEMENTS

- Python with Generative AI Course (2025-2026)
- Indian Bank Training Program - Comprehensive banking fundamentals and operations training
- Cargo Booking Executive Course - Professional certification in cargo booking operations and logistics coordination
- Co-operative Bank Internship - Banking Operations experience with focus on process optimization
- One-Year Open Source Internship - VGLUG Foundation
- District & State Level Sports Participation - Demonstrates discipline, teamwork, and commitment to excellence

EDUCATION

Bachelor of Commerce (B.Com) - Arignar Anna Government Arts College

Expected Graduation: 2026 | Percentage: 69%

HSC (12th Grade) - Gandhi Memorial Higher Secondary School, Thiruvennainallur

Board: Tamil Nadu | Year: 2023 | Percentage: 80%

SSLC (10th Grade) - Gandhi Memorial Higher Secondary School, Thiruvennainallur

Board: Tamil Nadu | Year: 2021 | Percentage: 67.67%

LANGUAGES

Tamil: Native Proficiency | English: Professional Working Proficiency
